

Product Change Notification

PCN No: 2011-11-28-01
Report Date: November 28, 2011
Subject: LK162-12 PCB Rev 3.2 Release
VK162-12 PCB Rev 3.2 Release

List of New / Changed Products:

All the following alphanumeric displays (and their variants):

LK162-12 (all variants) VK162-12 (all variants)
--

Reason for Change:

ESD feature addition.

Product Change:

The current PCB revision 3.1 had only one ESD grounding attachment to the bottom left mounting hole of the display module. The new PCB revision 3.2 has two ESD grounding attachments on both the bottom left and right mounting holes.

By default, these ESD grounding attachments (pad connections) to signal ground are not populated as it is expected that customers will provide a chassis ground through the actual chassis.

No new functional changes; the display module performs exactly the same as previous revision. PCB Rev 3.2 is a drop in replacement for PCB Rev 3.1.

Schedule of Change:

December 1, 2011

Documentation Revision

Revision	Changes	Date	Author
1.0	Initial Release	November 28/11	R Malinis
